

## Educational Session

***Samuels NR.***

***“Stretch Your Mind and Their Skin: The Role of Elastic Taping in Wound Management”***

***America Physical Therapy Association Combined Sections Meeting. Denver, CO. February 13, 2020.***

This session will introduce the concept of elastic taping as an adjunct modality in the treatment of swelling, mechanical impairments, and related conditions that impact wound healing. Attendees will have the opportunity to participate in a hands-on laboratory session focused on elastic taping applications for various swelling and wound-related impairment simulations.
